PROFESSIONAL EXPERIENCE

Senior Software Engineer at DealerOn
Feb 2021 - Present

.NET | C# | TypeScript | Vue.js | Azure | SQL | AI-Assisted Development

- Designed and maintained scalable full-stack automotive software applications using .NET, C#, TypeScript, Vue.js, SQL server, and AI-assisted development with Claude and Copilot.
- Designed scalable REST APIs and distributed backend services enabling reliable integrations across customer-facing applications and enterprise platforms that served over 500,000 daily requests across 4,000+ automotive dealerships throughout North America.
- Served as a senior technical contributor by leading technical design discussions, authoring architecture and implementation designs, conducting code and design reviews, and driving cross-team engineering initiatives.
- Improved software development lifecycle (SDLC) practices by developing internal tooling, shared libraries, and testing frameworks that increased developer productivity and code quality for more than 120 software engineers..
- Mentored engineers through code reviews, pair programming, technical design guidance, and knowledge sharing.

IT Technician at University of Maryland, Division of IT
Sept 2019 - Jan 2021

Problem-solving | Documentation | Remote Tooling | Windows | Linux | MacOS
